

Free Team Portal

What is a team portal?

It is a web site that is accessible from a web browser that allows members of your team to share information including files, announcements, contacts, events and more.

Why is it free? What's the catch?

Your portal remains free for you to use provided you are not a business and you provide at least one converted referral per month. Otherwise you will be charged \$5 per month to cover basic hosting costs. Alternatively, if you provide a converted commercial referral then you'll receive 12 months portal use and support for free.

Who's going to help me setup my free portal site?

Your site will be supported by the Computer Information Agency. This means that your team can handle the simple tasks of posting and updating information while having the confidence of knowing that anything else will be taken care of by skilled IT professionals.

Are there any other conditions?

Yes, there are a few conditions on how much information can be stored on the site but in most cases we believe there is more than enough for most teams. If you have specific needs then we can show you ways to utilize other free online resources to store your information. For more information please contact director@ciaops.com.

Where can I get more information?

Contact us directly via director@ciaops.com for more information and a free 30 day trial. After that, if you continue to provide at least one converted referral per month your site remains free. If not, then all it will cost you is \$5 per month.
